

I вариант

1) $\frac{10}{12} - \frac{4}{12} = \frac{6}{12}$

2) $\frac{11}{25} + \frac{12}{25} = \frac{23}{25}$

3) $\frac{22}{43} - \frac{15}{43} = \frac{7}{43}$

4) $\frac{8}{13} - \frac{2}{13} = \frac{6}{13}$

5) $\frac{8}{9} - \frac{5}{9} + \frac{6}{9} = 1$

II вариант

1) $\frac{14}{15} - \frac{2}{15} = \frac{12}{15}$

2) $\frac{28}{47} + \frac{2}{47} = \frac{30}{47}$

3) $\frac{19}{35} - \frac{14}{35} = \frac{5}{35}$

4) $\frac{8}{17} + \frac{6}{17} = \frac{14}{17}$

5) $\frac{7}{8} - \frac{5}{8} + \frac{6}{8} = 1$
